Testing scenario for website usability tests: http://automationpractice.com/index.php

Date: 20.05.2022

1. After clicking on the link, the main page of the store opens.

2. The page shows several clothes to choose from.

3. After clicking on the product, should be able to choose the size and color (if the product is available in several color versions).

4. The website allows to add several different products.

5. After going to the "cart", an order summary appears.

6. Then the page allows you to log in (if the customer has an account), entering address data, select the delivery address and select the payment method.

7. After completing the data check, moves to the payment page.
